

For potential distributors

# iDoperation Series

Privileged access management software **iDoperation**

User activity monitoring software **iDoperation SC**

NTT TechnoCross Corporation

# We are NTT TechnoCross

NTT TechnoCross is a fully owned subsidiary of NTT, a leading telecom company in Japan and the world. We develop and market innovative solutions by crossbreeding NTT R&D technologies in areas such as AI and security.

We have lots of security specialists and provide various security solutions. One of them is Privileged Access Management (PAM) product "iDoperation", which is the best-selling product in Japan.

Privileged access management

Version 3.3

**Simplify  
management of  
privileged access.**

# iDoperation supports secure privileged access and visualization of risk

Privileged access management is now a critical issue for companies to address. iDoperation automates everything from granting of proper privileged access to problem detection to achieve a safer, more secure and efficient IT operation environment.

## SECURITY

---

It supports the prevention of fraud by privileged users and the implementation of measures against cyber attacks, which have become a major threat in recent years.

## COMPLIANCE

---

It supports the enhancement of controls such as internal controls and J-SOX auditing, and the handling of guidelines such as FISC safety standards and PCI DSS.

## COST REDUCTION

---

Workstyle reform and operation outsourcing are attracting attention. iDoperation supports reduced operations in information system departments and outsourcing of management operations.

# Achievements

Japan's leading privileged access management tool with a commanding share.

8 years in a row

# No.1

Temporarily grant privileged access based on approval.

### Privileged access inspection

[Click to start DEMO](#)

Inspect recorded access and operation logs with auto ease.

# We are looking for partner companies!

iDoperation has been successful in Japan and its market is still growing due to lots of companies working on DX. NTT TechnoCross is now expanding its commercial service in Thailand.

We are actively looking for partners who can work together from aspects such as sales & promotion, ongoing support services and engineering, etc. in Thailand.

We would like to provide necessary supports to promote iDoperation in Thailand market. If you have interests in iDoperation or the partnership program, please feel free to contact us.
